OBJECTIVE

Computer and Data Science student at Knox College seeking summer 2026 software engineering internships. Experienced in full-stack development, embedded systems, and machine learning.

EDUCATION

Knox College, Galesburg, IL

Sep. 2024 – Jun. 2028

Bachelor of Science in Computer and Data Science

GPA: 3.88/4.00

- Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Systems, Software Development

EXPERIENCE

Software and Embedded System Team Lead

Nov. 2024 – Present

Knox MakerSpace

Galesburg, IL

- Led development of a campus-wide ticketing system serving 500+ users, reducing average issue resolution time by 40%.
- Built a centralized inventory management system to track equipment usage and streamline checkouts across 5+ departments.
- Built a touchscreen interface for real-time monitoring and control of a filament extrusion system used by the 3D printing team.

Front-end Development Intern

Nov. 2023 – Jun. 2024

Cinfores Limited

Port Harcourt, Nigeria

- Optimized website performance, reducing page load times and increasing user engagement by 60%.
- Designed responsive web pages using HTML, CSS, and JavaScript, ensuring cross-device compatibility.
- Led frontend development of a React Native mobile app for managing employee donations and loans, serving 100+ workers.

PROJECTS

DevLog – Developer Productivity Tracker

Jan. 2026 – Present

React, Node.js, Express, PostgreSQL, JWT

- Built a full-stack developer productivity app with JWT authentication, enabling users to log, categorize, and review daily coding sessions.
- Designed a RESTful API with Express and PostgreSQL, supporting CRUD operations for session logs, tags, and user profiles.
- Implemented a React dashboard with filtering, search, and data visualization to help developers track progress over time.
- Deployed with Docker and configured CI/CD pipeline for automated testing and deployment.

Sustainability Waste Classification System

Sep. 2025 – Present

Python, TensorFlow, Streamlit, OpenCV, Scikit-learn

- Built an end-to-end waste classification system using a CNN trained on 3,000+ labeled images, achieving 89% accuracy across compost, landfill, and recycling categories.
- Optimized preprocessing pipeline with OpenCV, reducing inference latency for real-time image classification.
- Developed an interactive Streamlit web app with live camera capture, enabling users to classify waste items instantly.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, Assembly, SQL (PostgreSQL), HTML/CSS, R

Frameworks & Libraries: React, Next.js, Node.js, Django, Express, JUnit, Material UI, Tailwind CSS

Developer Tools: Git, Docker, AWS, VS Code, Visual Studio, MongoDB

Data Science Tools: pandas, NumPy, Matplotlib, TensorFlow, Scikit-learn, OpenCV
